Protector range

Advantage Structured Growth Portfolio (MSG)

This portfolio offers conservative investors capital preservation through exposure to a diversified basket of equities, bonds and cash, while protecting against volatility associated with direct equity investments.

About the Protector range

The Protector range provides a broad array of options for investors who prefer to target either absolute return or minimise downside risk. The Protector range provides risk-targeted solutions to address investors' concerns about:

- Definitive control of downside risk
- Matching inflation
- Loss of capital in absolute terms

This range provides either implicit or explicit solutions to clients, as well as variations within each group.

Portfolio mandate

This portfolio offers members of pension and provident funds exposure to a diversified basket of equities, bonds and cash investments. At the same time it limits the effect of fluctuating investment returns of the underlying investments. The portfolio allows significant exposure to the equity market, while protecting investors against the natural volatility associated with direct equity investments.

Investment strategy

The Advantage Structured Growth portfolio will be invested in hedged equities, bonds, cash and alternative strategies. Bonuses are declared monthly in advance and once declared vests fully. The portfolio's benchmark is CPI +4 %.
